Summary

Software Engineer at SHL with experience in full-stack development, focusing on building scalable backend systems and dynamic frontend interfaces. Proficient in working with cloud platforms, databases, and modern development tools to deliver high-performance, production-ready applications.

Education

Ajay Kumar Garg Engineering College   Aug 2020 – June 2024
Bachelor's degree in Computer Science and Engineering: 8.1/10   *Ghaziabad, India*

Coursework

- Data Structures And Algorithms
- Object Oriented Programming
- Database Management System
- Operating System and Computer Networks

Technical Skills

Languages: C++, C, Java, PHP, JavaScript, Python
Technologies: Node, Express, React, BootStrap, MongoDB, MySQL, Git, EC2, S3, Elastic
Developer Tools: Linux, AWS, GCP, Azure, Bamboo, Jira, Confluence, Bitbucket

Experience

SHL   Feb 2025 – Present
Associate Software Engineer   *Gurugram, India*

- Working as a full-stack developer at SHL, primarily focusing on backend development using Go and PHP, along with building dynamic UIs in React.
- Hands-on experience with AWS services like EC2, Elastic Beanstalk, and S3 for application deployment and infrastructure management.
- Actively involved in designing scalable APIs, system architecture, and ensuring performance optimization across the stack. Also work extensively with relational and NoSQL databases for data modeling, query optimization, and performance tuning.

Accenture   July 2024 - Feb 2025
Associate Software Engineer   *Gurugram, India*

- Gained hands-on experience with enterprise-grade backend technologies and data-centric application development in a corporate setting.
- Developed a strong understanding of large-scale system architecture, database operations, and best practices for clean, efficient backend code.

Projects

WealthTrack   Github Link
Node Js, Express Js, React Js, MongoDB

- Built a finance tracker app using the MERN stack to help users manage their finances efficiently and track their expenses, income, and budgets in real time, providing a clear overview of their financial status.
- It features a responsive and intuitive interface that displays detailed analytics and insights, helping users make informed financial decisions and stay aligned with their savings goals.

Taskly   Github Link
React Js, Vite, Tailwind CSS

- Developed a dynamic to-do list app using React to help users organize and manage their tasks efficiently.
- Implemented features such as task categorization, drag-and-drop reordering, real-time updates, and a responsive design to ensure a seamless user experience across all devices.
